Rab8b Polyclonal Antibody

Source: Goat

General description: Goat polyclonal antibody to mouse Rab8. Rab8 belongs to the small GTPase superfamily, Rab family. It has cell-type specific function during the process of exocytosis and coordinates regulation of the cytoskeleton. Rab8 also appears to interface with endocytic recycling circuits. At the molecular level, this GTPase regulates both the export of vesicles from the trans-Golgi apparatus, and the directed translocation along actin filaments and microtubules.

Alternative names: RAB8A, RAB8B, RAS-associated protein RAB8A, ras-related protein Rab-8B, ras-related protein Rab-8A, ras-related protein Rab-8B antibody.

Reactivity: Reacts against human, rat, mouse, canine and monkey proteins.

Form: Polyclonal antibody supplied as a 200 µl (3 mg/ml) aliquot in PBS, 20% glycerol and 0.05% sodium azide. This antibody is epitope-affinity purified from goat antiserum.

Immunogen: Purified recombinant peptide derived from within residues 107 aa to the C-terminus of mouse Rab8b produced in *E. coli*.

Specificity: Detects Rab8b protein in transfected cells with GFP-Rab8b cds by Western blot. This Ab is specific for Rab8b. It does not recognize Rab8a.

Sample	Western blot	Immuno-fluorescence	Histochemistry (paraffin)	Histochemistry (frozen)
human	+++	ND	ND	ND
rat	+++	ND	ND	ND
mouse	+++	ND	ND	ND
canine	+++	ND	ND	ND
monkey	+++	ND	ND	ND

+++ excellent, ++ good, + poor, ND not determined

Usage: Western blot 1:250-1:1,000
Immunofluorescence ND
Immunohistochemistry (paraffin) ND
Immunohistochemistry (frozen) ND

Storage: Store at -20 C for long-term storage. Store at 2-8 C for up to one month.

Special instructions: Avoid freeze/thaw cycles.

SICGEN's Proprietary Immunogen Policy

In order to produce high specific antibodies SICGEN has invested a lot of time and effort into selecting immunogen sequences. SICGEN has decided to protect this information by not publishing it on the website. However, these sequences are available on request.
